Notes:

- Items **X1** coloured in **PURPLE**:- Will be temporarily removed then reinstalled on the outside of the new components.
- Items **X1** and **X2** coloured in **GREEN**:- Although some fixings are removed during the pre-installation steps they are to remain in position.

Towbar Installation:

- Remove the four fixings at the rearmost mounting points and the two vertical fixings in **X1** with reference to the Notes above.
- Loosely attach items **B** with item **X1** to the inside face of each chassis, with items **E** as spacers at the rearmost mounting points and fix in place using items **N** with items **Q** with items **C** inserted into the chassis extensions.
- Loosely attach items **X1** to items **X2** using items **L** and items **P**. **Note:** Item **P** shown in **CYAN** is also used as a spacer between items **X1** and items **X2**.
- Using items **M** with items **Q** loosely fix item **A** to items **B** to the position shown in **Figure 1**.
- Using items **J** and items **K** with items **Q** fix item **F** and item **H** to item **A** to the position shown in **Figure 1**.
- Fully tighten all fixings ensuring the Towbar is rigid, square, and secure.

Figure 1

Note:-
Item P Used
As A Spacer

Notes:

- For Torque settings see general notes overleaf.
- Nose load limits and vehicle manufacturer's trailer / caravan weight limits must be observed.
- We recommend the use of PRO-TOW Couplings with all our products.
